

## TR-300

### Parking Ticket Dispenser

The TR-300 ticket dispenser is an advanced entry column for parking facilities, designed to provide efficient access control. In addition to ticket-based entry, this system supports access via proximity cards and mobile phones, offering a versatile and modern solution for parking management.

#### Features

- Barcode or QR Technology provides a fast, secure, and user-friendly access solution.
- Issues 3000 thermal tickets per paper roll.
- Provides on-line real time ticketing data. Press button, take ticket, barrier gate opens.
- Utilize RFID cards (proximity or Mifare or long range) for subscriptions.
